

Honeybee check water smoke agent

Bee Silent

□ Product features

Remove attack from Honey bee!

- Do not damage the ecosystem
The same ingredients contained in honey restrain aggressive behavior temporarily.
- Reduce frequency of damage to be stabbed at the time of inspection
After the ingredients adhere, aggression is reduced for about 3 to 5 minutes.
- Effective in places where smokers cannot be used
Useful at the time of inspection, especially at Birdhouse points where fire smoke is prohibited.

It is not an insecticide or insecticide!

It is effective only when "the Bee Silent component" is sticked to the bee's sense of touch. Spraying clothes and skin has no effect. Restrain the bee's attack behavior temporarily, and it should be helpful for nest box inspection.
